CLAIM

Independent Claim Number 1 - Currently Amended

I claim the receptacle rim which is comprised of the following element, (A) a circular elastic band, sewn into a 100 percent cotton vesture in order to secure said vesture and a condom for competent protection specifically against Phthirus Pubis (crabs), scabies, and H.P.V. (warts), of which the receptacle rim creates a closed system that properly shields its user from the aforementioned diseases; whereby the receptacle rim fits around the base of the penis, "as modified men's briefs" and secures both Dermawear, modified men's briefs, and the condom so that inherently the stated scope of use in this invention of Dermawear is to specifically and conveniently protect its user, when Dermawear is worn with a condom, from the transmission of Phthirus Pubis, scabies, and warts as detailed in the description.

Immediate Prior Version

~~Independent Claim No. 1 (Currently amended): I claim the use of Dermawear as a wearable garment that will consist of any type of fabric but particularly a 100 percent cotton vesture as a protective apparel during sexual intercourse against epidermic parasites and/or sexually transmitted diseases of the genital skin not protected by a condom.00013. In chattel, what I claim as my invention is: the "Receptacle Rim" of "Dermawear," which cannot be independent of the subgarment (fabric shield) since the subgarment itself serves as the protective aspect of "Dermawear"; and the "Receptacle Rim" is an outlet for an erect penis.~~

~~00014. — What I claim as my invention is: the subgarment made of any type of fabric, but primarily consisting of 100 percent cotton set forth and combined with a “Receptacle Rim,” which are dependent components in alliance for one purpose: to protect the male pubic region and scrotal skin from sexually transmitted diseases; and in the nature of this purpose exists “Dermawear,” my claim of invention.~~

~~Independent Claim #1:~~

~~00015. — “Dermawear” is a pioneering concept, and what I claim as my invention is the “Receptacle Rim” and its shielding subgarment made of any type of material (polyester, rayon, tweed, etc.), but primarily consisting of 100 percent cotton.~~

~~Independent Claim #1:~~

~~00016. — What I claim as my invention is a subgarment (fabric shield) with its “Receptacle Rim” worn only at the time of sexual copulation, and therefore distinguished by its consumer purchase for intent of application; and the intent of application is established within the intent of manufacture of “Dermawear” (fabric shield) and its “Receptacle Rim.” A claim “within intent of manufacture” means applied use or intent of application by consumers for the sole purpose of protecting themselves against sexually transmitted diseases; hence, “Dermawear,” my claim of invention.~~

CLAIM

Independent Claim Number 2 – Currently Amended

I claim the loop defense strands comprised of “modified men’s briefs” and further comprising the following element, (B) interwoven looped threads, and sewn into the face of the garment above the receptacle rim in order to simulate pubic hairs which entangle the bugs of Phthirus Pubis, scabies, and warts (viral R.N.A./D.N.A.), so that inherently the stated scope of use in this invention of Dermawear is to specifically and conveniently protect its user, when Dermawear is worn with a condom, from the transmission of Phthirus Pubis, scabies, and warts as detailed in the description.

Immediate Prior Version

~~Independent Claim No. 2 (Currently amended): I claim in utility a specialized elastic hole which is cut out in the front of the Dermawear garment as an outlet for the male penile shaft and/or an opening for the female vaginal canal. The scientific name for the elastic hole in the medical garment of Dermawear is the “Receptacle Rim.” The elastic band of the receptacle rim fits comfortably around the circumference of the base of the penis and is used in conjunction with a condom as a 100 percent protection barrier against sexually transmitted diseases.~~

00017. ~~What I claim as my invention is "Dermawear's" intent of application:~~
~~"Dermawear" is not for the vanity of fashion as an intent of consumer application~~
~~with respect to appearance, but it is protective wear.~~

CLAIMS 3 – 6 (CANCELED)

~~Number 3 Dependent Upon Claim Number 1 Currently Amended~~

~~In the Alternative~~

~~—A modified men's brief according to Claim 1, or as in Claim 1, in which the "receptacle rim" is dependent upon its stitching work as attached and held together on the body of "modified men's underwear" comprising coverage which extends down from the waist to the thighs; Dermawear is currently nonobvious to the general public but with the education of the consumer Dermawear will become distinct as a medical garment that is used in conjunction with a condom to specifically protect against Phthirus Pubis, scabies, and warts. Dependent upon Claims 1 and 2 Dermawear is the common art of men's underwear modified by utility to consist of a receptacle rim and loop defense strands where its stated scope of use (as set forth in the claim) is its principal object of invention to conveniently protect its user from the transmission of Phthirus Pubis, scabies, and warts, when worn with a condom.~~

~~Independent Claim No. 3 (Currently amended): I claim ownership of the intent and application of use of the Dermawear manufactured medical product for retail sale to persons buying additional protection for the genital region, which has not been afforded by condom use alone. I reaffirm and assert title to the fabric shield of Claim 1, and the "Receptacle Rim" of Claim 2, for which the whole Dermawear~~

~~garment in utility will cover the skin of the genital region during sexual intercourse in order to defend against the following skin parasites: Phthirus Pubis (crabs), Human Papilloma Virus (warts), Haemophilus Ducreyi (chaneroid), Sarcoptes Scabiei (scabies), Plaques (Tinea, Syphilis), Herpes (Biofluid Hazard), Lesions (Biofluid Hazard), and any and all biofluids containing residue protein of R.N.A. — D.N.A. material that is capable of sticking to skin during naked sexual genital to genital contact. Dermawear will have a double butted (2 in 1) fabric shield with a fluid resistant material sown in between the garment for a redundant protection against skin pathogens of the genital region. Dermawear will also contain a loop defense shield which is a microscopic pubic hair simulation consisting of 100 percent cotton strands.~~

~~00018. — What I claim as my invention is “Dermawear’s” intent of application: “Dermawear” is not for the ordinary and common consumer use as a subgarment of comfort against the friction of surface apparel, but it is protective wear against sexually transmitted diseases.~~

CLAIMS 3 – 6 (CANCELED)

~~DEPENDENT CLAIM~~

~~Number 4 Dependent upon Claim Number 2 Currently Amended~~

~~In the Alternative~~

~~A modified men's brief according to Claim 2, or as in Claim 2 in which the loop defense strands are dependent upon its stitching work as attached and held together on the body of "modified men's underwear" comprising coverage above the "receptacle rim"; Dermawear is currently nonobvious to the general public but with the education of the consumer Dermawear will become distinct as a medical garment that is used in conjunction with a condom to specifically protect against Phthirus Pubis, scabies, and warts. Dependent upon Claims 1 and 2 Dermawear is the common art of men's underwear modified by utility to consist of a receptacle rim and loop defense strands where its stated scope of use (as set forth in the claim) is its principal object of invention to conveniently protect its user from the transmission of Phthirus Pubis, scabies, and warts, when worn with a condom.~~

~~00019. What I claim as my invention is: the nonobvious distinction of "Dermawear" as a tactical use against diseases and of the slim contrasting and/or set apart from the practical ordinary and obvious use of subgarments worn with a consumer intent of application (applied use) for comfort alone.~~

CLAIMS 3 – 6 (CANCELED)

~~Number 5 Dependent upon Claim Number 2 (Currently Amended)~~

~~In the Alternative~~

~~The functional parts of Dermawear are (1) the fabric shield, (2) the Receptacle Rim with its elastic band, (3) and the loop defense strands.~~

~~00027. What I claim as my invention is “Dermawear” juxtaposed: comparatively, “Dermawear” is nonobvious in that it is made of interlocking and tightly woven, double butted (2 in 1 subgarment) 100 percent cotton material, and has a protective function and uses a half inch circle (or triangle, or octagon, or rectangle) or “Receptacle Rim” invented to fit tightly against and/or around the base of the penis.~~

~~Dependent upon Claim #2:~~

~~00028. What I claim as my invention is: “Dermawear” juxtaposed: a subgarment or “fabric shield” with a “Receptacle Rim” and an intent of manufacture for consumer use against sexually transmitted diseases.~~

~~Dependent upon Claim #2:~~

~~00029. What I claim as my invention is: the legal merit of “Dermawear” or protective subgarment and its nonobvious use as safe skin wear against sexually~~

~~transmitted diseases; so as to be nonobvious to a person having ordinary skill in the medical equipment area of S.T.D. technology.~~

~~Dependent upon Claim #2:~~

~~00030. — What I claim as my invention is: the deure of “dermawear” as a subgarment for medical use (intent of application) and a preventive classification, expressed as a “medium (barrier) process” of protection from sexually transmitted diseases of the male genital area (pubic region and scrotal skin).~~

~~Dependent upon Claim #2:~~

~~00031. — What I claim as my invention is: “Dermawear” and its intent of application through its new and specific attribute of a “Receptacle Rim” set forth as a ½ inch circular hole.~~

~~00032. — What I claim as my invention is: “the utility right of “Dermawear,” or subgarment protective skin wear (P.S.W.) as my intellectual property.~~

CLAIMS 3 – 6 (CANCELED)

~~Number 6 Dependent upon Claim Number 3 (Currently Amended)~~

~~In the Alternative~~

~~The technical merit of Dermawear is its protection against: (1) Phthirus Pubis, (2) Human Papilloma Virus, (3) Haemophilus Ducrelyi, (4) Sarcoptes Scabiei, (5) Plaques of tinea and syphilis, (6) Herpes biofluid of blister discharge, (7) lesions of any disease with biofluid discharge, (8) Eggs of Phthirus Variant (E.O.P.V.: a human Phthirus Pubis and Sarcoptes Scabiei inner body infestation—eating red blood cells—triggering one of several Leukemia causes, and one of the various malignant neoplasms as blood cancer. A white blood cell proliferation occurs and red blood cells revert to an immature and less differentiated form. With increased nutrition Phthirus and Sarcoptes mutate from their original biology of shape and behavior. From their feeding secondary infections result out of their excrement. Clinical manifestation—recurring nits upon the pubic hair shaft long after external curative treatment.) (9) General pruritus of the pubic area from any pathogenic cause, (10) any skin to skin contact of the genital region where a condom alone is not 100 percent effective in preventing sexually transmitted diseases.~~

00033.——What I claim as my invention is: “Dermawear’s” Technical Merit of Protection against: (1) Genital Human Papillomavirus; (2) Sarcoptes scabiei

~~(Scabies); (3) phthirus Pubis (Crabs); (4) Cancerous Parasitic Mutated Mite
(C.P.M.M./Protein fusion of skin).~~

~~Dependent upon Claim #3:~~

~~00034. ——— What I claim as my invention is: “Dermawear” technical merit of
protection against: (1) Biofluid Hazards; (2) Viral shedding; (3) Purulent material
from lesions (Biofluids); (4) Chaneroid; (5) Pruritus of the pubic area; (6) any skin-
to-skin contact, as “Dermawear” is a medium barrier between human to human
disease inoculation.~~

~~Dependent upon Claim #3:~~

~~00035. ——— Whenever use can be demonstrated then utility has been defined.
“Dermawear” is the use of protection against sexually transmitted diseases.~~

~~Dependent upon Claim #3:~~

~~00036. ——— “Dermawear” is the specificity of use, set forth as the intent of
application (applied use) against S.T.D.’s.~~

~~Dependent upon Claim #3:~~

~~00037. ——— The functional parts of “Dermawear’s” subgarment are: (1) “fabrie
shield,” and (2) “Receptacle Rim” purposed as the complete entity of utility
protection against sexually transmitted diseases.~~

~~Dependent upon Claim #3:~~

00038.——Claim: ~~(1) Receptacle Rim; (2) Fabric Shield; (3) Intent of manufacture resulting in consumer use of purchase as an intent of application or applied use for protection against sexually transmitted diseases. “Dermawear” is mindful of the female anatomy and stands ready to be manufactured for consumer use by women for protection against sexually transmitted diseases.~~

Filing Date: 9/22/2003
Re: Claims

Claims 1 and 2 remain unchanged as currently amended. Claims 3 through 6 are affirmed herein as canceled due to the continued technical stresses of literary form over patentable substance conveyed to the inventor by the U.S.P.T.O.

Claims 1 and 2 (currently amended) now show the underlined text and the comparative strike through text of the immediate prior version of the patent application now in compliance with 37 CFR1.121.

I submit to the United States Patent and Trademark Office my utility application for "Dermawear" containing a total of 2 claims asserted as "Modified Men's Briefs."

Remarks Section
Application #10/667, 634
Filing Date: 9/22/2003
Re: Drawings

There were no changes made to the drawings, only an addition (Loop Defense Strands illustrated). A clarification of the labeling of the drawings was made. Example: Loop Defense Strands Figure 1A is the correction of the label and not of the drawings. Replacement sheet was added in accordance with the rule of the U.S.P.T.O. The loop defense strands sewn into the men's briefs modifying the underwear was added language typed on the drawings for clarification of the label designation: "Loop Defense Strands, Figure 1A." Elastic Band Figure 2B is again the correction of the label and not the drawings. Circular Elastic Band sewn into the men's briefs modifying the underwear was added language typed on the drawings for clarification of the label designation: "Elastic Band Figure 2B." On the original drawings previously tendered to the U.S.P.T.O., the label designations were not clear. The corrections were made on the replacement sheets sent to the Patent Office. The "Replacement Sheets" illustrated the loop defense strands. The previous labeling mistake in the old "Brief Description of the Drawings" incorrectly listed 3C as loop defense strands simulating hair which is attached hereto as an "Annotated Sheet."

Note: 3C is no longer a part of the drawings. Again, the drawings are the same since the original filing date through present. Even though the loop defense strands were in fact illustrated on the "Replacement Sheets" and mistakenly omitted on the original drawings.
